Strategic Directions for Market Development

Thank you for providing this opportunity to make submissions on the Electricity Authority's document: Strategic Directions for Market Development.

We suggest two additions to the document:

- Clear and explicit mention of the Government's 90% renewable generation by 2025 and an acknowledgement that the electricity market rules can influence the achievement of this target.
- An assessment of the state of play internationally in relation to electricity markets and insights for the NZ electricity system. It would be helpful and insightful to briefly outline trends in electricity market systems, just as the document looks at technology trends.

Yours sincerely,

Eric Pyle
Chief Executive
