

EIEP 1: Clarification on Network Charge

Discussion

3 April 2014

Network charge description in EIEP 1 is unclear

- 1 The network charge description in EIEP 1 leaves room for network owners to interpret what the network charge should and should not include.
- 2 Is the network charge meant to be a pre-discount amount? Due to the words 'net of', some networks believe the amount populated into the field should be post-discount amounts.
- 3 Clarification is required to ensure that systems are set up correctly for generation of these files from 1 November 2014.

Network charge	Num 7.2	M	M	The network charge (in dollars and cents, excluding GST and net of any prompt payment discount) which is calculated from the "Unit Quantity", "Chargeable days" and "Network tariff rate" as applicable. Null if status equals UB
