MEDIA RELEASE: 18 November 2014

Potential electricity savings of over \$400 for some East Coast residents

Consumers from the East Coast visited the What My Number website more than 550 times during winter to check if they could get a better deal on their electricity bill, with their average estimated savings calculated at \$223 per annum. .

According to the statistics, released by the Electricity Authority, some results from the site identified estimated savings of over \$400 per annum by switching power companies.

"New Zealanders utilising the [What's My Number](#) website have found that they could save significantly on their power bills by shopping around," says Electricity Authority Chief Executive Carl Hansen.

"Spring is a good time to check to see if you are on the best deal. As the seasons change, so do our power needs. Different sized households also have different needs depending on their lifestyle, and these statistics show that families of all sizes could make significant savings by shopping around."

Over the winter New Zealanders visited the What's My Number website more than 60,000 times, with the national average for estimated savings identified by the site coming in at \$175 annually. There were 96,407 actual switches nationally over winter.

What's My Number spokesperson Judy Bailey has also used the website to check her deal. "I love to know I'm getting the best deal for my money. The What's My Number online tool is a simple way to check if you're with the best power company for your needs. It's quick and easy and you can do it in two minuteswhat's to lose?!"

What's My Number is run by the Electricity Authority in partnership with Consumer NZ, putting choice in consumers' hands by helping them to shop around. To find out if you're getting the best deal for your power, visit www.whatsmynumber.org.nz and don't forget to check!
