

Memo

To Retailers and third party providers
From Ron Beatty
Date 12 October 2015
Subject Memo no.3: Retail Data Project: EIEP13A, EIEP13B and EIEP13C requirements

For your information

The Authority wishes to advise the following to those parties that are building systems to interface with EIEP13A, EIEP13B and EIEP13C requirements.

1. Email groups will be available for notification of EIEP13s. The registry will email an address listed in an email group if the email group has been setup with the appropriate file types. This is an amendment to the requirements documented in EI-010 of the registry functional specification.
2. To clarify requirements for unmetered load. Unmetered load may have no meter or data storage device serial number, or register content code. In these instances, the serial number and register content fields should be left blank.

Also as requested in our last memorandum (no.2) dated 1 October 2015 regarding EIEP system testing, can you please advise the following (as requested in the above memo):

- For testing purposes please provide contact details for your test contact(s) and email this to marketoperations@ea.govt.nz. In the email subject line please state: RDP Test manager contact details - <<name of your organisation>>.
- In the body of the email, in addition to your test managers contact(s) names(s), please also inform the Authority of your indicative test dates, within the testing window of 1 November 2015 and 11 December 2015 (see memo no 2 for further details).
- Note: some retailers may also wish to test as agents so please let us know in what capacity testing will occur and if you intend to seek a non-participant identifier where you act as an agent.

Many thanks

Ron Beatty
