Issues Addressed

Ref.	Raised	Description	Status
ER-167	24/01/2014	Administration App - File Audit Screen Enhancements	Complete
ER-462	25/11/2015	Modify refresh agent to remove all old email contacts	Complete
ER-468	10/12/2015	Relax restriction on reversal event index to allow duplicate time stamp keys. Duplicate time stamp keys are valid for reversal event.	Complete
ER-469	14/12/2015	Filter SOAP parsing error from Monitoring	Complete
ER-470	16/12/2015	EIEP Audits summarized description may contain incorrect details if multiple invalid files from the same participants are submitted and rejected consecutively	Complete
ER-473	07/01/2016	PR-140, Monthly switch completion - average business days calculation using trader events created by CS. If the trader event is replaced, the average business calculation reports incorrect number of days. PR-140 now uses the CS message to calculate the business day.	Complete

Documentation Updates

Enhancements

ER-167 File Audit Screen Enhancements

In Administration App, the File Audit screen can only view the files not older than one day. After that, the files will be stored in the archive directory on the server. This enhancement can provide the capability for Administration App users to view the archived Audit files in the server and allow them to copy the selected archived files from the server to the selected target directory in local PC.
