1. Introduction

1.1 Purpose

This report details monthly information in relation to the Wholesale Information & Trading System (WITS), clearing manager, pricing manager, reconciliation manager and extended reserve manager functions performed by NZX under contract to the Electricity Authority (Authority).

This report contains core reporting requirements in compliance with Clauses 3.13 and 3.14 of the Electricity Participation Code 2010 and relevant Market Operator Service Provider (MOSP) agreements.

2. Compliance

2.1 Compliance with Regulations and Code

For this month, to the best of our knowledge, the WITS, reconciliation manager, clearing manager and extended reserve manager service providers fully complied with the Code and regulations.

There were two breaches of the Code by the pricing manager with respect to Clause 13.142(1).

On the 11 December 2017 the pricing manager incorrectly published prices as interim for trading date 10/12/2017 when they should have been published as provisional. When prices were published as interim there was an unresolved metering situation.

On the 24 December 2017 the pricing manager incorrectly published prices as interim for trading date 23/12/2017 when they should have been published as provisional. On this occasion when prices were published as interim there was an unresolved infeasibility situation.

Both incidents were as a result of analyst error and were corrected following the pricing error claim process.

2.2 Operation of the Regulations and Code

For this month, the NZX service providers have not identified any areas of the Code that require addressing.

2.3 Compliance with MOSP Agreements

All provisions of the WITS, reconciliation manager, clearing manager and pricing manager MOSP agreements have been adhered to during the reporting month.
