

9 October 2018

Introduction

Omnibus and EIEP Forum

Ron Beatty, Principal Adviser Market Services

Disclaimer

This session provides general information to help participants understand several consultation papers

The information presented at this session is not intended to be definitive and should not be used instead of legal advice.

Requirements of the Code and service provider systems change over time, and participants should ensure that they review the latest copy of the Code and functional specifications.

If there is any inconsistency between information presented and the Code, the Code takes precedence.

Agenda

09.05 am – Update – Ron Beatty

09.45 am – Part 6 – Network hosting capacity – Clive Bull

10.30 am – Morning break

10.45 am – Access to WITS and the registry – Ron Beatty

11.15 am – Review of metering and related registry processes – Michelle Heise

12.15 am – Lunch

01.15 pm – Switch process review – Ron Beatty

03.00 pm – Afternoon break

03.15 pm – EIEPs – Ron Beatty

04.15 pm – General discussion

We live and work in a changing world

- The energy industry in New Zealand will be transformed over the next 30 years, to the benefit of our economy, our environment and our customers as NZ seeks greater long term electricity sustainability

The industry is on a journey into the future

- As competition grows in the electricity sector, and new technology is integrated
 - the way we generate and use electricity will change. Greater use of distributed resource
 - customer service requirements and service provider offers will evolve
 - more participants will leverage technology based solutions to drive customer value
- We are already starting to see change as industry processes begin to impede the adoption of new and beneficial technology and services eg switching, microgrids etc
- The Code and market processes are critical to the efficient operation of the contestable electricity market and adaption must occur
- The challenge for us all in the industry and regulation, **is keeping up**
- Today we are talking about tweaks and changes to regulatory settings, and a major question about the core industry ICP switching process

Market enhancement omnibus

- As part of our refreshed 2018/19 work programme, we are coordinating the consultation processes for projects into an omnibus series.
 - coordinating the consultation process for these types of projects should progress minor market enhancements faster and more efficiently
 - we expect to release an omnibus consultation in around August/September and March/April each year
- We have released the first market enhancements omnibus, available at <https://www.ea.govt.nz/development/work-programme/operational-efficiencies/market-enhancement-omnibus/>

Market enhancement omnibus

Paper name		Type of consultation	Who this is most relevant for
