**Date** 11 December 2018  
**Subject** Notification to Traders - Code Review Programme 2018 decisions  
**For your information**

---

Between January and March this year, the Authority consulted on a range of discrete amendments to various parts of the Electricity Industry Participation Code 2010 (Code). We released our [decision and reasons paper](#) on 2 October 2018, and publicised this in our weekly market brief.

We would like to draw traders' attention to specific amendments which either came into force on 1 November or will come into force in early 2019:

Reference number	Topic	Decision	Date Code amendment comes into force
2018-04	Clarifying when losing trader must respond to switch move request	Implement an amended form of the proposal	1 November 2018
2018-06	Amending or rescinding an approved shorter post-default exit period	Implement an amended form of the proposal	1 November 2018
2018-08	Amending the timeframe for the clearing manager to calculate constrained off/on amounts	Implement an amended form of the proposal	1 November 2018
2018-09	Calculation of switching event dates	Implement an amended form of the proposal	1 November 2018
2018-10	Requirement to have an arrangement with a customer or embedded generator at an ICP before commencing the switch process	Implement the proposal without change	1 November 2018
2018-11	Providing submission information to the reconciliation manager	Implement an amended form of the proposal	1 November 2018

Reference number	Topic	Decision	Date Code amendment comes into force
2018-13	Timeframe for completing switch event meter reading disputes	Implement the proposal without change	1 February 2019
2018-15	Clarifying clauses 19, 21, and 22 of Schedule 15.2	Implement an amended form of the proposal	1 November 2018
2018-16	Switching ICPs with category 3 or higher metering installations that have advanced metering infrastructure (AMI) components	Implement an amended form of the proposal	1 February 2019
2018-17	Removing the defined term “customer” from Part 1	Implement an amended form of the proposal	1 November 2018
2018-18	Update to security forms under Schedules 14A.2 to 14A.	Implement an amended form of the proposal	1 November 2018
2018-19	Making volume information permanent	Implement the proposal without change	1 February 2019
2018-21	Decommissioning a metering installation	Implement the proposal without change	1 November 2018
2018-22	Clarifying when a reconciliation participant may connect or electrically connect certain points of connection	Implement an amended form of the proposal	1 November 2018
2018-23	Editorial corrections to the Code	Implement an amended form of the proposal	1 November 2018

Note the table above does not include all amendments made and we recommend that traders become familiar with all the Code amendments listed in the [decision and reasons paper](#).
