Dear Peter

Variation to Registry Manager Market Operator Service Provider Agreement

I refer to the Registry Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and Jade Software Corporation (NZ) Limited (Jade), dated 25 January 2017, relating to services provided by Jade as the registry manager.

The Authority would like to replace clause 10.3 of Schedule 2 of the non-functional specification of the MOSPA, as follows:

10.3 History

The **system** must retain **data** and **processed data** for immediate access. Archiving of data could cause operational problems to the **system** and **users** and must not be archived. However the batch files received from and delivered to participants may be archived after 30 days, provided the **system** retains the **data** that was contained in those files. Any batch files must be available for retrieval on request.

The **Provider** will be required to maintain all the historical **data** and **processed data** contained in the system immediately prior to 1 May 2017 for use in providing the **services** relating to periods prior to 1 May 2017.

A copy of the non-functional specification with the proposed variation incorporated is attached to this letter. If you agree to it, the varied non-functional specification will become version 1.2 of Schedule 2 of the MOSPA.

Please confirm your acceptance of the variation proposed in this letter by signing and returning a copy of this letter to me. The proposed variation to the MOSPA will take effect on the date you sign this letter.

Yours sincerely

Grant Benvenuti
General Manager Market Performance (acting)

I, Peter Smith, agree for and on behalf of Jade Software Corporation (NZ) Limited to the variation to the MOSPA set out in this letter.

Date: 30 June 2020
