Dear Ana

Amendment to Registry Manager Market Operator Service Provider Agreement

I refer to the Registry Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and Jade Software Corporation (NZ) Limited, dated 25 January 2017, relating to services provided by Jade Software Corporation (NZ) Limited as the registry manager.

The Authority would like to amend the functional specification in Schedule 3 of the MOSPA, as follows:

- Security section 1.16: update to reflect registry users with a status of reset must not affect access to web services
- Appendix A, calculation of ICP checksum: correct typo in checksum wording
- Replace the terms energise, energisation and de-energise with electrically connected throughout the specification.

A copy of the functional specification with these proposed amendments incorporated is attached to this letter. If you agree to it, the amended functional specification in Schedule 3 of the MOSPA will become version 22.21.

Please confirm your acceptance of the amendments proposed in this letter by signing and returning a copy of this letter to me. These proposed amendments to the MOSPA will take effect on the date you sign this letter.

Yours sincerely

Rory Blundell
General Manager Market Performance

I, Ana Sever, agree for and on behalf of Jade Software Corporation (NZ) Limited to the amendment to the MOSPA set out in this letter.
