Hi Andy

Sorry for the delay. We recommend that the following paragraph is clarified from:

“Note that Contact does not use water values for the Clutha scheme. Contact has advised that this is because the Clutha is essentially a run-of-river scheme with very low storage compared to its generation capacity. Accordingly, for present purposes we used DOASA water values for Contact.”

To:

“Note that Contact does not use water values for the majority of generation from the Clutha scheme. Contact has advised the Clutha is essentially a run-of-river scheme with very low storage. Generation attributable to stored water in Hawea accounts for only 10-15% of total generation volumes. Accordingly, for present purposes we used DOASA water values for Contact.”

Regards,  
Chris

Hi Chris

As discussed on the phone, please find attached a letter seeking your feedback on a fact checking exercise and an extract of the relevant material.

Let me know if you have any queries.

Kind rgds Andy
