

Memo

To All Participants
From Ron Beatty
Date 29 August 2013
Subject Threshold defaults to be applied under the Electricity Industry Participation Code 2010 (Code)

Version	
17 Sept 2008	Original issue
29 Aug 2013	Re-issued with item 6 added for new metering rules

For your information

The following are the notified defaults to be applied under the Code:

1. Default profile code (clause 7(5) of Schedule 15.4)
 - DFP for embedded network SB ICPs
2. Clause 15(2) of Schedule 15.2: Half hour estimates percentage
 - +/- 10%
3. Clause 6(3) of Schedule 15.3: Submission error percentage threshold
 - +/- 15% per balancing area
4. Clause 18(1)(b) of Schedule 15.4: Scorecard calculation threshold
 - 1.02
5. Clause 25(f) of Schedule 15.4: Half hour metered ICP consumption comparison percentage
 - +/- 10%
6. Clause 10.14(2)(b)(ii): approved predictable load types for the extended unmetered load threshold
 - amenity lighting (including billboards, advertising hoardings, bus shelters, phone booths, school signs, public conveniences)
 - street lighting (excluding street lighting that is distributed unmetered load)

- right of way lighting
- under veranda lighting
- floodlighting where the usage of the lights is regular on a daily basis
- traffic lights
- radio transmitters/receivers and communications cabinets
- distribution equipment
- sewage and stormwater pumps.

A handwritten signature in black ink, appearing to read 'Ron Beatty', with a stylized, cursive script.
